THE UNION SECURITY COMPANY OF WASHINGTON, D. C. ines of similar organizations in this country and in Enriand, as d which are the result of long experience and capable management.

There is need of such an enterprise in this District. Corporate suretaship is superior in every respect to that of individuols, and is, therefore, preferred by those for whose benefit the security is to be given, while on the other hand those who are required to furnish the security greatly prefer to see it as a master of business from a corporation rather than as a matter of favor from friends.

To the stockholder this company presents substantial attractions. It is pre-used to make investments in loans on ample real estate and other safe securities, and as the company's expenses will be comparatively light the shareholder may reasonably expect from the investment of its capital alone a return approximating what he might realize from a personal investment of the money represented by his stock, besides a participation in the commissions and premiums earned.

The proposition is not a new one, as a similar effort was made to have this plan adopted about eight or ten years ago. A strong fight was made against the change, and it was defeated. The same opposition, it is stated, exists today and renders it doubtful whether the proposed change can be effected.
